

Check any forum about your options for moving or storage and you'll see the same thing again and again. Moving with PODS containers is easier than doing it all yourself and much cheaper than hiring professional movers. It's also a better storage solution than self-storage units. PODS affordable storage containers make loading easier, delivery a breeze and the entire moving process a little less hectic. This innovative storage solution is popular for five good reasons.

Convenience

You can have a PODS container dropped off in your driveway whenever you want. You can then keep it there as long as you want. Then, you can get it delivered wherever you want. All of this is done for you, saving you a lot of time and effort. Once you have your PODS unit loaded up, you simply call your PODS franchise and they will bring it to their secure, climate-controlled warehouse storage facility for you, or they will send it to any other continental US location you desire.

Customer Service

Customer service is vital to the success of any business. PODS have proven their worth through the popularity of this handy storage solution. These containers are used worldwide, not just in the US. People all over the world have experienced the ease, convenience and affordability of PODS units. Customers always have a toll free 800 number to call and a human being ready to help resolve any problems or questions they may have quickly.

Availability

PODS serves all of the continental United States, so you will always be able to find a PODS franchise nearby and never have trouble getting a PODS container delivered wherever you need it. It's nice to know that you won't have to unpack everything at once. You can have your container delivered to the local PODS storage facility, unload the essentials, and keep the rest in storage until you are ready to unpack everything. This can be especially helpful in cold winter moves.

Superior Storage

Storing your things at a PODS facility is much easier on your property than self-storage. With PODS, your container is stored in a secure warehouse with other containers. The controlled environment means your things are not exposed to harsh cold or blazing heat the way they are in self-storage units. This also means you don't have to expose yourself to the elements just to retrieve some items from storage. Your property waits for you in the same comfortable environment it would be exposed to at home.

Trust

With more than a million moves completed, you can trust PODS to handle your move properly. The company even went so far as to design a special lift system so that your PODS container always stays level, ensuring the contents are not mishandled. They even thought of preventing damage to your driveway by designing the system to operate without scraping the ground. You get a great price, a great service and the peace of mind knowing you are working with experts in the moving and storage industry.
